## ABOUT ME

From full-time barista & coffee roaster to full-time student, the allure of constant problem-solving and comprehending complex ideas drew me to data analytics. I've greatly enjoyed the team-aspect of data analytics, as well as the numerous networking opportunities at NSS.

Looking forward, I plan to stay in the greater Nashville area and to seek out a position that I can grow in my skills as an analyst. With my previous dabbling in the medical field, I am drawn to the healthcare side of analytics, but I do not intend to limit my search to only healthcare.

## TECHNICAL SKILLS

- Excel
- SQL
- Power BI
- Tableau
- Python
- Kanban
- GitHub
- AGILE method

## PROJECTS

### METRO SCOOTERS ANALYSIS

Group project at Nashville Software School

Our team collaborated on cleaning & analyzing data using Python & SQL queries, as well as visualizing with Folium interactive maps & matplotlib. Our goals included checking if Nashville scooter rental companies were in compliance with Metro's legislation to regulate powered scooter usage, as well as giving suggestions for optimal numbers & density of scooters per zip code, as well as primary marketing audience.
